

Ethos of Change: Mobilizing Others Effectively in Difficult Change Initiatives

Ethos of Change is a relatively untapped positive disposition towards change we all possess. It separates those who are able to cope effectively with change from those who resist it to their detriment. In corporate leadership operating in highly competitive markets, it is a highly-sought way of being, an emblem of competitiveness that goes beyond usual processes and techniques of standard change management literature. Ernest Stambouly reveals how to transform resistance into competitiveness, a required skill for leading in fast-paced markets. He shows simple ways to embrace change that work powerfully because they are consistent with how we fundamentally operate as human beings. He unveils the secrets of our innate disposition to cope with change to our advantage, and offers guidance on surmounting cultural friction and organizational barriers to mobilize others for overcoming their resistance safely. Ethos of change equips competitive business organizations with a keen skill to adapt to and leverage marketplace innovations rapidly.
