

The Book of St. Louisans: A Biographical Dictionary of Leading Living Men of the City of St. Louis (Classic Reprint)

Excerpt from The Book of St. Louisans: A Biographical Dictionary of Leading Living Men of the City of St. Louis. The value of a book depends first on its matter and secondly on its form. The Book of St. Louisans, which now, after nearly a year of active preparation, is placed in the readers hands, is a reference book of local biography, confined to living men of St. Louis and its vicinity. It aims to present all the personal information regarding its thousands of subjects, that may be sought without impertinence and can be read without weariness. In method of selection and treatment, The Book of St. Louisans is modeled after Whos Who in America, the well-known and standard biographical dictionary of notable living Americans, with one distinct difference. That book takes in Americans of National prominence, whereas the present volume confines its efforts to the men who are resident in or near St. Louis and are identified with its interests and activities. Endeavor has been made, within the limits just mentioned, to fill the requirements of a biographical dictionary containing the life-sketches of every St. Louis man entitled to be included in a work of this character about whom the necessary data could be procured. The closing line in that last sentence must be taken as the justification for whatever errors of omission may be charged to the present volume. Names there are, fully as worth, perhaps, as any of those whose life-data appear in these pages, which are, unfortunately, absent therefrom, but such omission is in no case wilfully made, on the part of the makers of this book, and in very few cases, if any, chargeable to their negligence. In almost every case the omission is due to the neglect, and in a few to the refusal, of the missing man to furnish the information requisite for biographical mention. As now completed and presented The Book of St. Louisans will be found to

contain a far larger number of biographical sketches of the most active and representative men of St. Louis than has ever before been gathered into any publication. In character and importance, as well as in numbers, this is the most complete presentation ever made of personal information about St. Louis men. The selection has been carefully confined to men engaged in reputable pursuits and identified with important business, professional and other interests in St. Louis. In very large measure, The Book of St. Louisans is a business dictionary of the city. Yet, while the representatives of the local business world preponderate, as they should, St. Louis being first of all, a commercial, financial and manufacturing center, they by no means monopolize the volume.
